There are so many choices, it can be easy to lose the focus or personal preferences that will end up creating the really “special sanctuary” you desire.

REMODELING A BATH OR BUILDING A NEW ONE?

Helpful hints to keep in mind:

1. Consider using a certified designer for bathrooms or at least an experienced, qualified interior designer.
2. Safety is important for bathrooms. Keep this in mind when selecting flooring and glass products.
3. Faucets are available with anti-scald devices –ask about these.
4. Select an area for medicine storage that is safe, but also convenient, and make a list of all of your storage needs.

People are talking!

“All your employees conveyed the feeling that they genuinely cared about my family and home.”
 – Mr. Babcock II

For 25 years, our highly trained technicians have used state-of-the-art equipment and techniques to keep islanders pest, termite and rodent-free.
