

### WHAT ARE THE TOP TRENDS?

The size of bathrooms continues to increase. If it means knocking out walls to create the needed space, that seems to be what current homeowners are choosing to do. "Today the bath needs to be big enough to accommodate everything homeowners want to include. Bathroom furniture and a separate shower and bath tub are emerging as hot items in today's bath," says Jim Krengel, a Certified Bathroom Designer as seen on [www.abathroomguide.com](http://www.abathroomguide.com).

A whirlpool tub is generally at the top of most everyone's "wish list." The design of this product has advanced to include armrests, ergonomically correct headrests and a variety of sizes and shapes.

Corner tubs, roman tubs, body spa systems and soft tubs are also available. White is still the number one color in bathroom fixtures and the homeowner uses color on walls, floors, fabrics, towels, rugs and even furniture. The basic bath is a thing of the past. Most everyone wants to add a little of their own personality to each bathroom. So, color and accessories are very important.
